OBJECTIVE

B.Tech Computer Science graduate specializing in MERN stack development and core software engineering principles. Proficient in building end-to-end web applications, managing dynamic data, and crafting responsive user interfaces. Strong foundational knowledge of Data Structures, Algorithms, and Object-Oriented Programming. Eager to leverage technical proficiency to contribute effectively within multi-functional development teams as a Software Engineer.

EDUCATION

B.Tech CSE, From Meerut Institute of Technology, Percentage: 82.3

2024

TECHNICAL SKILLS

Programming Languages	C++, JavaScript, Java
Frontend Technologies	React.js, Tailwind CSS, HTML5, CSS3, Bootstrap
Backend Technologies	Node.js, Express.js, REST API Development, JSON Data Handling
Databases	SQL, MongoDB (NoSQL)
Core Coursework	DSA, OOPs, DBMS, Operating Systems, Computer Networks
Tools & Platforms	Git, GitHub, VS Code, Postman

PROJECTS

Expense Tracker

Tech Stack : JavaScript, React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Postman, Git

- Developed a dynamic full-stack expense tracking web application, enabling users to seamlessly manage financial transactions, categorize real-time spending, and view data visualizations.
- Designed and engineered the responsive front-end architecture using React.js and Tailwind CSS, leveraging React hooks for optimized component state management.
- Integrated robust backend REST APIs using Node.js and Express.js, leveraging MongoDB for secure transaction storage and utilizing Postman for thorough API testing. [Live](#) — [Source Code](#)

Netflix UI Clone

Tech Stack : JavaScript, React.js, Vite, TMDB API, HTML5, CSS3, Git

- Developed a responsive web application using JavaScript and React.js, integrating the TMDB REST API to asynchronously fetch and render dynamic movie content.
- Engineered a modular, component-driven architecture to manage distinct UI sections, incorporating dynamic media banners and integrated YouTube trailer playback via iFrames. [Live](#) — [Source Code](#)

Kanban Task Board

Tech Stack : JavaScript (Vanilla), HTML5, CSS3, Git

- Developed a lightweight Kanban task-management web interface using Vanilla JavaScript, implementing full CRUD functionality with real-time timestamps for dynamic task handling.
- Engineered a custom drag-and-drop workflow system using native JavaScript event listeners, eliminating any dependency on external libraries. [Live](#) — [Source Code](#)

ACHIEVEMENTS

- Achieved Grade A across all modules of the AMCAT 2023 assessment, validating core analytical and technical aptitude.
- Solved 150+ DSA problems on competitive platforms including LeetCode and GeeksforGeeks.
- Secured a score of 595 in the CoCubes 2024 assessment, demonstrating strong technical aptitude and industry readiness.
